

How Sufalam built a user-friendly iOS app to help users get work done and become more productive?

About The Project

The client wanted to build an intuitive yet user-friendly mobile app for iOS users that helped users in recording things to do and get tasks done. Wanting to develop something different from the available apps in the market, the client was looking for an experienced iOS app developer that can cater to his specific app development needs.

Team Sufulam analyzed his requirements and incorporated several features that made the app better than existing To-do mobile apps in the market.

Solution Offered

The client wanted that the users can share the tasks with other users and the apps should automatically move incomplete tasks to the next day's To-do list. Team Sufalam build a robust solution with social sharing capabilities and several other distinctive features like Vault Category to help users become more productive.

Features of application

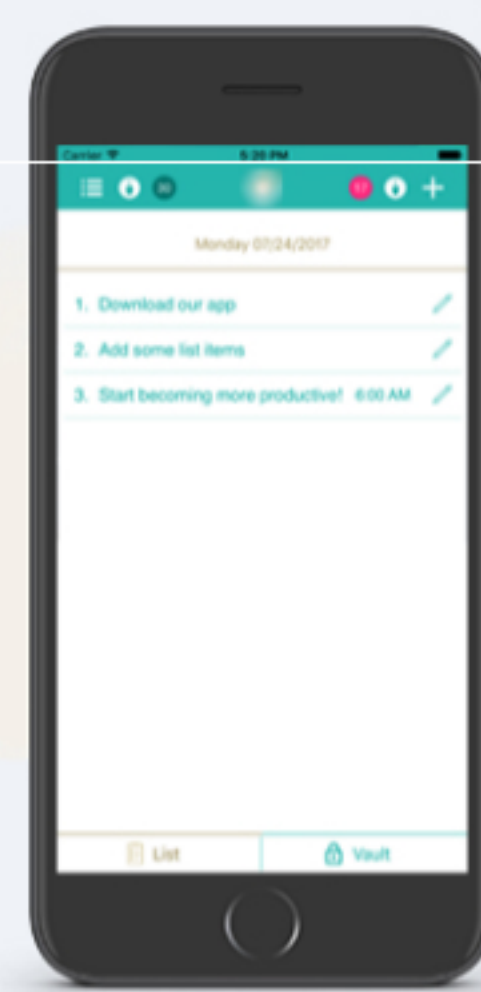

Application user and download information

Objective

Developing a cutting-edge mobile app that helped users to become more productive by recording what's to be done during the day.

Key Features

- ✓ **Login:** Login to the application via mobile number
- ✓ **Signup:** Create a new user account
- ✓ **Dashboard:** Check out to-do task lists, set priorities by moving the tasks up or down and be more organized.
- ✓ **Add New Task:** Add a new task to your daily roster. Set time, description and add to a specific to-do list.
- ✓ **Edit Task:** Edit or update the task details- time, description or sharing status for visibility to other users.
- ✓ **User Profile:** Update details like username, email address, application theme and view rank based on completed tasks.
- ✓ **Settings:** Update account settings, notification settings, reminder time settings, email address, sharing status or sign out.

Solution Benefits

The user-friendly mobile app made it easier for end-users to manage daily tasks and become more productive. Users can set priorities, share tasks with friends and the mobile app makesure to move the incomplete tasks to the next day's task list, saving users the hassle of task management.

Platforms Supported

- ✓ iOS 9.0 & above: iPhone, iPad, and iPod Touch

Tools Technologies Used

Xcode

Swift 2.2.
